

Child Care Search and Decision-Making among Hispanic Families: New Findings and New Horizons

Welcome

Co-Chairs:

Michael López, Ph.D. & Erin Bumgarner, Ph.D., Abt Associates

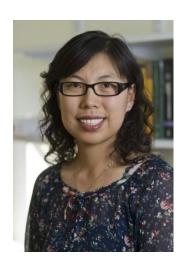

Presenters:

Yoonsook Ha Boston University

Colleen Vesely, Ph.D. George Mason University

Disclaimer

The views expressed in this presentation do not necessarily reflect the views or policies of the Office of Planning, Research and Evaluation, the Administration for Children and Families, or the U.S. Department of Health and Human Services.

Center Mission and Objectives

Mission: A hub of research to help programs and policy better serve low-income Hispanics across three priority areas:

- Poverty reduction and economic self-sufficiency
- Healthy marriage and responsible fatherhood
- Early care and education

Primary Objectives:

- 1. Conduct Research
- 2. Build Capacity
- 3. Communication and Dissemination

Motivation for Today's Presentation

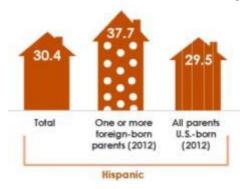

1 in 4 of all U.S. children are Hispanic

Over 90% of Hispanic children were born in the U.S.

Roughly 1 in 3 of Hispanic children live in poverty

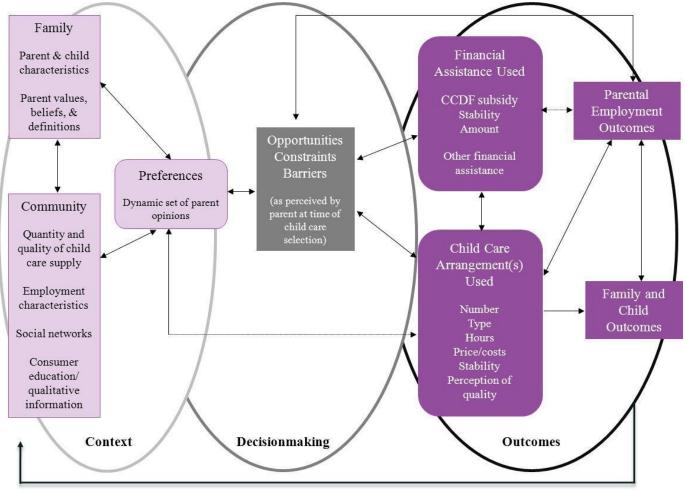

1 in 2 Hispanic children have a foreign-born parent

Motivation for Today's Presentation: Parental Child-care Decision-making

Outcomes become part of context for next child care decision

(Weber, 2011)

Colleen Vesely

- Most relevant research
 - Previous qualitative work (Vesely, 2013; Vesely, Ewaida, & Kearney, 2013)
 - Recent CBPR work (Goodman, Vesely, Letiecq, & Cleaveland, forthcoming)
- Most critical areas of knowledge base
 - Complexity of child care preferences and decision-making processes (Hernandez, Denton, & Macartney, 2011; Weber, 2011; Vesely, 2013)
 - Comparable and unique experiences to other populations (Forry, Tout, Rothenberg, Sandstrom, & Vesely, 2013; Vesely, 2013)
- Implications for a future research/policy
 - Families with infants and toddlers (NCEHS-CCP)
 - Situating child care experiences within the complexity of families' lives

Yoonsook Ha

- Most relevant research
 - Impact of family immigration status on child care choices
 - Patterns of child care subsidy use among Hispanic families
- Most critical areas of knowledge base
 - Choice of care type and associated factors
 - Immigration status and access to resources
- Implications for a future research/policy
 - Contribution of various factors affecting care choices
 - Increased access to publicly funded early care and education programs

Group Discussion

- Family preferences are complex and dynamic: How to balance complexity, with focused approach?
- Underutilization of center-based care: Exceptions?

Preference for center-based vs. home-based care?

 Cultural preferences vs. limitations in access and availability? Some combination of the two?

Group Discussion

 How does immigration status specifically affect child care decision among Hispanic families?

Barriers vs. Strengths-based focus?

Implications of your research for programs:
 Need for "creative measures"?

Group Discussion

 Implications for your research for policymakers: childcare subsidies and CCDF reauthorization? Greatest unknowns?

The most critical research gaps?

Data "wish list"?

Thank You!
